

# SUKUNA INU WHITEPAPER

Have you ever been to one of the most beautiful countries in Asia, which is called "The Land of Rising Sun"? Yes, that is Japan, which is famous not only for Sakura, Fuji mountain... but also for the developed anime and manga industry.

Based on this trend, Sakuna Inu, is a project that has been developed by us, which is taken an idea from a famous manga: JUJUTSU KAISEN. In this series, Sakuna, who is the strongest and coolest character, has a great nickname:

## "KING OF CURSES"

**ABOUT:** Jujutsu Kaisen, is a Japanese manga series written and illustrated by Gege Akutami, which is adapted into an anime on the television channel in October 2021. As of February 2021, Jujutsu Kaisen manga has more than 30 million copies released, including digital versions, making it one of the best-selling manga of all time. The story began in the golden age of magicians, at that time there existed a magician named Ryomen Sukuna, an ancient demon has 4 arms, 4 legs and 2 faces facing opposite directions.

As the "King of Curses", Sukuna is proficient in countless high-level and powerful curses. One of them is a curse of revival that makes magicians no matter how powerful must also pity helplessness.

Taking an idea from Sukuna's power, we have created Sukuna Inu with faith that it shall be one of the most dramatically grown, outstanding, and long-lasting virtual currencies in the Crypto World.

### MISSION

Sukuna Inu is given a mission to bring crypto to youth people - a community of people, who are big fans of the anime and manga industry. They are enormously intelligent, dynamic, and vivacious people, considered like "King Of Curses" in real life, so they are capable of owning Sukuna coin in each segment of their financial ability. Moreover, their risk tolerance is higher than others. We have faith that Sukuna has conveyed the spiritual values in the anime series to them. On the other hand, they will also have material values just by owning this coin and loving their character.

**VISION:** \$SUKUNA is built on Binance smart chain, in a sustainable way to benefit both holders and project sustainability, it is decentralized and supported by its community of enthusiasts. Our contract is already audited by a great company in the crypto field: Solidproof and all functions are passed, the more tokens you hold, the more reflection token you will get. This is our great function which gives our holders great bonus for their support by holding. With our plan, we will not stop in short term, we will non stop moving and keep SUKUNA growing, the dev team will continue developing and designing NFT and an adventure game to give anime fans an experience of the journey across the ocean. Moreover, the use of meme tokens will bring them a lot of exciting and earning in future with SUKUNA INU longterm plan.

## SUKUNA INU ROADMAP

### STAGE 1

- Design Logo
- Telegram + Twitter + Website
- Coding and deploy contract
- KYC + Audit
- Whitelist Contest
- Presale on Unicrypt
- Marketing Campaign + Call session
- Listing on Pancakeswap
- First 1000 holders

### STAGE 3

- Influencers marketing push
- Reach 1500 holders
- Apply for Coinmarketcap and Cointegrate listing
- 5000 Telegram members

### STAGE 2

### STAGE 4

- Reach 2500 holders
- Pushing marketing
- Brand establish and Cex listing
- NFT collections

Sukuna Inu

KYC & Audit by:

SUKUNA INU team has been passed KYC and Audit by SOLIDProof – big team from Germany.

**SOLID**Proof
